## Illegal streaming sites

### Be alert

With more people working from home, many businesses have detected more network traffic from employees using company computer equipment to illegally stream football.

Using GTG computer equipment? Avoid illegal streaming websites. These are extremely risky and can infect company IT systems with viruses capable of shutting our systems down or causing hefty GDPR fines.

### Challenge

We can detect illegal activity on our company systems and report this to the relevant line manager. But, if you witness any misuse of GTG's computer equipment, please report this to the duty manager or your course trainer.

### Protect

If you are in any doubt about which websites you can access using GTG computer equipment, please speak to your course trainer.
