About GTG Training

At GTG Training, we've been helping people stay safe for over 25 years.

We provide various interactive, classroom-based courses that ensure a sound understanding of health and safety practices. We design bespoke health and safety solutions, and boast an extensive and diverse client list — from hospitality and leisure to automotive and recycling companies. We also welcome individuals looking to boost their career potential by taking essential health and safety training courses.

Our clients all have one thing in common — when it comes to health and safety matters, we're their trusted first port of call.

Ways to learn

Public

Public Health & Safety courses are offered throughout the year and are open to organisations or individuals. You can find course info at gtg.co.uk/training-courses/health-and-safety or speak to one of our account managers to check upcoming dates and availability.

Private

Organisations can arrange private training for their team on a date that suits them. You can also choose to host any of our health and safety courses onsite at your own premises or at our fantastic facilities in Glasgow, Edinburgh or the West Midlands.

Online

Many of our courses are now available online via video call. Check the information listed on the relevant course outline in this booklet to find out if your chosen course can be completed online.

F.A.I.B. Approved First Aid at Work

Course description

The First Aid at Work course is designed to help employers meet the legal requirements of the Health & Safety at Work Act 1974 and is formally certificated by the First Aid Industry Body.

This training course will provide key health and safety skills that allow first aiders to effectively deal with injured people, or people who have suffered sudden illness before medical aid is available. Delegates are required to take a refresher course every three years.

Who should attend this course?

Anyone designated to act in the role of the first aider in the workplace.

Key benefits

- F.A.I.B. approved training course.
- Provides the skills and knowledge required for first aid and the techniques to apply them.
- Teaches principles and practice of first aid and the roles and responsibilities of a first aider.
- Incident and casualty management, including top-to-toe survey.
- Care and monitoring of the unconscious casualty (i.e. recovery position and Glasgow Coma Scale).
- Competent use of an automated external defibrillator.

Course content

- Disorders of airway and breathing
- Circulatory and anaphylactic shock
- Disorders of circulation (i.e. heart disorders)
- CPR (cardio pulmonary resuscitation) protocol
- Treatment of wounds and bleeding
- Disorders of the brain (i.e. concussions, compression, stroke, diabetes and seizures)
- Treatment of burns and scalds
- The theory of bones, muscles and joints
- The effects of poisons on the body
- The effects of temperature on the body

Prerequisites

No previous experience is required, however delegates should have the ability to cope with physically demanding emergency procedures.

F.A.I.B. Approved Refresher First Aid at Work

Course description

This course helps employers meet their legal requirement under The Health & Safety at Work etc. Act 1974 and is formally certificated by the First Aid Industry Body.

This course will cover the safest and most effective ways to dispense first aid to those whom have been injured or suffer sudden illness before medical assistance arrives. Delegates are required to refresh their skills every three years.

Who should attend this course?

Anyone designated to act in the role of first aider in the workplace.

Key benefits

- Updates and re-qualifies delegates to the standard required by HSE, for the purpose of the Health & Safety First Aid Regulations 1981.
- Provides updates on any new procedures.
- Refreshes the knowledge and skills required for being a first aider in the workplace.

Course content

- Dealing with casualties in the correct treatment position
- Carrying out CPR (cardio pulmonary resuscitation)
- Treating wounds and bleeding
- Effectively using an Automated External Defibrillator
- Becoming able to identify and treat the following conditions:
 - Airway and breathing problems
 - Heart disorders
 - Circulatory and anaphylactic shock
 - Burns and scalds

Prerequisites

Delegates must hold a valid 'First Aid at Work' certificate. Attendance at a three-day First Aid at Work course will be compulsory if validity has lapsed.

COVID Update - Existing First Aiders Course

Course description

This is a 3-hour, instructor-led course which aims to provide an understanding of, and practical training in, the delivery of first aid whilst utilising PPE to reduce the risk of infection.

Course content

- PPE requirements to help reduce the risk of spreading coronavirus
- Administering CPR safely
- Administering first aid whilst wearing PPE
- Information and guidance on using first aid equipment
- Help with understanding Government Guidelines

Key benefits

By the end of the training session you should have an understanding of how to administer first aid during the current Coronavirus outbreak whilst protecting yourself and others.

Prerequisites

A valid First Aid certificate dated within the last 3 years.

Duration	Delivery	Ways of learning	Certification
Half day	Classroom or online	Public or private courses available	FAIB

F.A.I.B. Emergency First Aid

Course description

This course is designed to help employers with their legal requirements regarding the Health & Safety at Work etc. Act 1974 and provides delegates with the necessary skills to carry out emergency first aid at work before medical aid arrives.

This course is formally certified by the First Aid Industry Body and delegates are required to refresh their skills every three years.

Who should attend this course?

Anyone designated to act in the role of first aider in the workplace.

Course content

- Carrying out the roles and responsibilities of a first aider until medical help is available.
- Acting in an emergency situation.
- Caring for an unconscious casualty.
- Dealing with circulatory and/or anaphylactic shock.
- Carrying out Cardio Pulmonary Resuscitation (CPR).
- Dealing with a choking casualty.
- Dealing with a casualty suffering a seizure.
- Dealing with minor injuries and external bleeding.

Prerequisites

No previous experience is required. However, delegates should have the ability to cope with stressful and physically demanding emergency procedures.

Mental Health Awareness First Aid

Course description

This course is presented by our qualified SMHFA instructor and quality is continuously monitored by NHS Health Scotland. Scotland's Mental Health First Aid is supported by the Scottish Government to improve and promote the mental health of people in Scotland.

Who should attend this course?

The Mental Health First Aid course has similarities to a physical First Aid course (although it's more complex in nature). It is about learning ways to help others (and yourself) in the event of a developing mental health problem; experiencing the worsening of an existing mental health problem or being in a mental health crisis - until appropriate professional help is received, or the crisis resolves.

The course will benefit anyone with a professional or personal interest in mental health and wellbeing. Many businesses and HR managers have found the course to be a great asset to their own role in helping to support staff, colleagues and volunteers.

Key benefits

By the end of this course, participants will have considered:

- Attitudes to mental health and equality issues
- Developing active listening skills
- The impact of alcohol and drugs on mental health
- Suicide and how to talk and ask about it
- Understanding self-harming behaviours
- Understanding depression, anxiety, psychosis and how to offer first aid to someone experiencing these conditions
- The recovery message

The course does not train people to be mental health workers or counsellors but offers general information and insights around mental health issues. The knowledge gained, and the understanding developed on the course helps to remove the stigma and fear around mental health and gives participants the confidence to approach a person in distress, establish the facts as far as possible, offer initial comfort, provide advice regarding the access of professional support, encourage self-help and provide signposting where appropriate. By upskilling your staff, you will give people the tools to keep themselves and their colleagues healthy.

The impact of Mental Health First Aid Training

Participants report a range of improvements to their own and to the mental health of those around them from implementing their learnings from the course. Participants say they feel more confident about approaching someone who appears distressed or supporting someone who is expecting a mental health problem.

Prerequisites

No previous experience is required.

Fire Warden Training

Course description

This course is designed to make sure that selected personnel can effectively carry out the duties of a fire warden, giving employers a well-trained workforce that can help them to reduce the risk of injury from fire.

In the event of a fire, the fire warden responds calmly, quickly and effectively to ensure the safe and full evacuation of everybody on the premises.

We work in partnership with The Institute of Fire Engineers, which means our course material is accredited to awarding body standard and is in line with UK legislation.

Who should attend this course?

Employees who have been or are about to be appointed as a fire warden with fire safety responsibilities within an organisation. This course is also designed to help private individuals understand hazards beyond the workplace.

Key benefits

- Encourages personnel to take an active role in the protection of staff and business premises in the event of a fire.

Course content

- Underpinning knowledge of fire warden duties.
- Assisting with an effective evacuation process.
- Understanding the laws and implementation of controls.
- Practical instruction on the safe use of the fire extinguishers.

Prerequisites

There are no formal criteria for this course. However, delegates should be prepared to carry out their role in a potentially stressful situation.

Manual Handling

Course description

This course is designed to give delegates the opportunity to rethink the way they lift and handle items at work, to explore safer ways to do so and enable delegates to understand the importance or the need to plan out a way to carry out tasks with the opportunity to practice kinetic methods in the workplace.

Who should attend this course?

All personnel involved in manual handling and lifting at work and employees responsible for the Health and Safety of fellow staff at work.

Course content

- State the current legislation on manual handling operations.
- Demonstrate the effect on the spine of the correct and incorrect lifting techniques.
- Demonstrate the correct manual lifting and handling techniques.
- The course outlines employer and employee duties.
- Spinal awareness, injuries and their causes.
- Consideration to be taken before lifting and handling tasks and assessing such task and risks.
- Correct lifting and handling techniques will be demonstrated and followed by practical lifting and handling and include team work/lifting.

Prerequisites

No previous experience is required.

-----------	-------------	-----------------

Manual Handling Instructors

Course description

The course provides an opportunity to understand and practice a professional approach to training design and delivery, with a structured syllabus and assessment opportunity. It is ideal for anyone who needs to either understand the basics of training practice, or wants to refine their training techniques. The course will also give delegates the skills to deliver sound manual handling techniques and understand the processes of conducting manual handling risk assessments. Those who have never delivered training before will find it an ideal basis for their future training activities. The programme will involve a significant amount of hands-on activity with additional work outside the sessions to develop the content and materials for assessment on the final day. The programme is quite demanding because it results in the acquisition of new skills and techniques over a short period of time.

Who should attend this course?

Managers, supervisors, instructors, training officers, safety professionals and others who are responsible for instructing others in manual handling and for carrying out manual handling risk assessments. Certification applies to the company with which delegates are currently employed and covers the instruction of employees within that organisation only.

Units and elements of competence

- On completion of the course, delegates should be able to:
- Design training sessions by carrying out effective planning and preparation.
- Understand how training can be best delivered to secure effective learning.
- Understand how to structure and design training sessions.
- Make training sessions interesting, stimulating and relevant.
- Prepare and deliver a manual handling awareness training package.
- Carry out and record suitable and sufficient manual handling risk assessments.

Prerequisites

No previous experience is required.

Working at Height

Course description

This regulated and nationally recognised qualification has been specifically designed to increase awareness of safety considerations whilst working at height, including the importance of the equipment used and how to ensure a safe working environment.

During this 3 hour course, candidates will focus on the safety considerations, legal obligations, control measures and reporting procedures for working at height; leaving the course with knowledge of a wide variety of equipment and the principles used to ensure safe working at height.

Who should attend this course?

The QA Level 2 Award in Working at Height (RQF) is ideal for those who work, or are aspiring to work in any type of environment that may require them to work at height, such as: building and construction, agriculture, forestry, factories, warehouses and more.

What's covered?

- Legislation, regulations, roles and responsibilities when working at height
- The consequences of non-compliance
- Safe working practices when working at height
- How to reduce the risks from:
 - Weather conditions
 - Working environments
 - Others working at height
 - Falling objects
 - Fragile surfaces
- Importance of risk assessments
- Rescue plan requirements
- Types of equipment and testing requirements
- Selecting appropriate equipment
- Identifying safety precautions when using equipment
- Reporting procedures when equipment is faulty

Prerequisites

No previous experience is required.

Certificate in COSHH Risk Assessment

Course description

The Control of Substances Hazardous to Health Regulations 2002 (COSHH) require employers to control exposure to hazardous substances to prevent ill-health. The Level 2 Certification in COSHH Risk Assessment provides formal recognition of an individual's ability to undertake a COSHH risk assessment in line with the Health and Safety Executives Approved Code of Practice. Accredited by the Qualifications and Curriculum Authority (QCA) at Level 2 in the National Qualifications Framework.

Key benefits

- A nationally-recognised, transferable qualification based on the Health and Safety Executive's guidance to the regulations.
- Allows employers to get more of their staff properly qualified to carry out COSHH risk assessments, helping them to meet their legal obligations.
- Up-to-date and practical training, supplemented with completely new learning materials and specially developed interactive learning sessions.
- A fit for purpose assessment task related directly to the candidate's workplace, testing the application of learning in a practical context.

Course framework

Our training utilises the very latest learning methods, with special emphasis on participative and interactive techniques. Overall, the aim of our training is to share knowledge and practical experience and, through tutor-led sessions, build on that experience so that every participant is able to manage risk assessment effectively and realistically.

The training sets out to develop sound and practical knowledge and understanding for day-to-day application in the workplace and prepares each participant for the Level 2 qualification assessment.

Course content

- Reasons for conducting COSHH risk assessments.
- Main legislation relating to COSHH risk assessment.
- Competencies required of COSHH risk assessors.
- Hazardous substances and their effects on the body.
- Main classifications for hazardous substances.
- Interpreting information from safety data sheets.
- Use of workplace exposure limits.
- Factors affecting assessment of risk.
- Risk control strategies.
- Recording the findings of a COSHH risk assessment.
- Making recommendations based on the findings.
- Reviewing and revising a COSHH risk assessment.

Assessment arrangements

Candidates complete a workplace-based risk assessment task and submit this electronically to BSC Awards for marking by an external examiner. Results and certificates are issued within ten days.

Prerequisites

No previous experience is required.

Certificate in DSE Risk Assessment

Course description

The Health and Safety (Display Screen Equipment) Regulations 1992 require employers to assess both the workstation and the working environment of employees who regularly use computer workstations.

The Level 2 Certificate in DSE Risk Assessment provides formal recognition of an individual's ability to undertake a DSE risk assessment in accordance with the Health and Safety Executive's guidance to the regulations. Accredited by the Qualifications and Curriculum Authority (QCA) at Level 2 in the National Qualifications Framework.

Key benefits

- A nationally-recognised, transferable qualification based on the Health and Safety Executive's guidance to the regulations.
- Allows employers to get more of their staff properly qualified to carry out DSE risk assessments, helping them to meet their legal obligations.
- Up-to-date and practical training, supplemented with completely new learning materials and specially developed interactive learning sessions.
- A fit for purpose assessment task related directly to the candidates workplace, testing the application of learning in a practical context.

Course framework

Our training utilises the very latest learning methods, with special emphasis on participative and interactive techniques. Overall, the aim of our training is to share knowledge and practical experience and, through tutor-led sessions, build on that experience so that every participant is able to manage risk assessment effectively and realistically.

The training sets out to develop sound and practical knowledge and understanding for day-to-day application in the workplace and prepares each participant for the Level 2 qualification assessment.

Course content

- Reasons for conducting DSE risk assessments.
- Main legislation relating to DSE risk assessment.
- Competencies required of DSE risk assessors.
- Health effects relating to DSE use.
- Main causes of ill-health relating to DSE use.
- Principles and benefits of good ergonomic design.
- Minimum requirements for workstations.
- Recording the findings of a DSE risk assessment.
- Making recommendations based on the findings.
- Reviewing and revising a DSE risk assessment.

Assessment arrangements

Candidates complete a workplace-based risk assessment task and submit this electronically to BSC Awards for marking by an external examiner. Results and certificates are issued within ten days.

Health and Safety in a Construction Environment (CSCS)

Course description

The Level 1 Award in Health and Safety in a Construction Environment provides learners with an essential foundation in construction-related health and safety. It's suitable for individuals wanting to work in the construction industry and those already employed in the industry seeking to renew their knowledge in this area.

Who should attend this course?

This qualification was developed in partnership with the construction industry training board (CITB). From 1st July 2014, people wishing to apply for a CSCS Green Card need to pass a Level 1 award in health and safety in a construction environment – or they must hold a valid site safety plus health and safety awareness course certificate and pass a CITB operatives health, safety and environment test within two years of applying for a new card.

Course content

This course is set out in modular format, covering essential subjects in construction such as:

- The importance of health and safety
- Legal responsibilities for health and safety
- Fatalities, injuries and ill-health in construction
- Risk assessments and method statements
- Reporting accidents and ill-health
- Moving vehicles and mobile plant
- Hazardous substances, fire safety, noise safety and personal protective equipment (PPE)

Assessment

A multiple-choice exam is taken at the end of the course lasting 60 minutes. This consists of 40 multiple choice questions. Candidates need to achieve 26 correct answers to pass the assessment. The grading is pass or fail only.

Certificate

The Level 1 Award in Health and Safety in a Construction Environment is a prerequisite for anyone applying for a CSCS skills card.

Prerequisites

There are no formal entry requirements for this qualification. However, we expect learners to have adequate levels of literacy to undertake the examination.

IOSH Working Safely

Course description

Working Safely is an accredited course for employees from any sector with no specific supervisory or managerial responsibility. It provides a grounding in the essentials of health and safety – everyone at work should have an understanding of why they must ‘work safely’ and this course offers exactly that.

Working Safely introduces a completely new approach to health and safety training, and offers the full scope of a high-impact and interactive session.

Who should attend this course?

People at any level, in any sector, who require a grounding in the essentials of health and safety in the workplace.

Course content

- Introduction to working safely
- Assessing risk
- Understanding your responsibilities
- Improving safety performance
- Defining and identifying risks and hazards

Assessment

Delegates will be evaluated using a multi-format question paper and a multiple-choice hazard spotting exercise.

Certificate

An IOSH certificate will be issued to the delegates upon successful completion of the institution’s approved assessment procedures.

Prerequisites

This course is designed for those with some managerial responsibilities and experience – however, there are no formal entry criteria.

IOSH Managing Safely

Course description

IOSH Managing Safely is a course designed for those who are responsible for the day to day welfare of employees, visitors, clients, suppliers and contractors while they're on business premises. The course will deliver a varied scope of elements, such as how to effectively risk assess, and will ensure that organisational statutory duties and best practice of Health and Safety in the workplace are easily incorporated into day to day life.

Who should attend this course?

People within an organisation who will be, or are currently responsible for managing Health and Safety within their working capacity, e.g. managers, supervisors and team leaders. This course provides a good grounding in the understanding of key Health and Safety responsibilities.

Course content

The course is set out in modular format:

- Introduction to managing safely
- Assessing risk
- Controlling risk
- Understanding your responsibilities
- Identifying hazards
- Investigating accidents and incidents
- Measuring performance

Certificate

An IOSH certificate will be issued to delegates upon successful completion of the institution's approved assessment procedures.

Prerequisites

This course is designed for those with some managerial responsibilities and experience, however there is no formal entry criteria.

Duration	Delivery	Ways of learning	Certification

IOSH Managing Safely Refresher / Recertification

Course description

This course is designed for delegates who have undertaken the IOSH Managing Safely course within the last three years. It provides them with a refresher of the subjects covered and updates any legislation changes. There is a short test at the end of the course and on completion of the course delegates will receive an IOSH certificate.

Who should attend this course?

Anyone who has completed the IOSH Managing Safely course within the last three years.

Course content

- To update delegates' knowledge and understanding of health and safety issues.
- To review the changes in legislation and the impact on companies.
- To provide delegates with an understanding of compliance and practical systems control.
- Synopsis of health and safety legislation updates.
- Safety management systems.
- Active and reactive monitoring.
- Hazard and risk definition.
- Risk assessment and control measures.

Prerequisites

No previous experience is required.

NEBOSH National General Certificate in Occupational Health & Safety

Course description

The NEBOSH National General Certificate in Occupational Health & Safety is a basic qualification for people who are involved in health and safety at work. Such people include newly appointed safety advisors without previous experience, managers and supervisors with part-time responsibility for health and safety and safety representatives. For those appointed as part-time safety advisors the National General Certificate should give an adequate base for their work. However, for those with full time responsibilities as safety advisors, particularly in the more hazardous industries, further training will be required. Such people should consider obtaining the additional qualification of the NEBOSH National Diploma or a NEBOSH Specialist Certificate such as the NEBOSH National Certificate in Construction Safety and Health if they are working in a relevant industry. Please note this is an open book exam

Who should attend this course?

There is no formal set of entry criteria for admission to the National General Certificate programme. However, the examination includes a requirement to write a short report. Candidates with limited or no experience of report writing will therefore be given additional training in this subject to enable them to complete the practical assessment successfully.

Units and elements of competence

NEBOSH does not consider it appropriate to divide the NEBOSH National General Certificate in Occupational Safety and Health into elements of competence, which could be of value individually in a work situation. A person who can recognise hazards but is unable to recognise the way in which people react to legislation, or is unable to carry out a workplace inspection, would not be competent to discharge responsibilities for the safety and health of others at work.

Prerequisites

No previous experience is required.

Key benefits

This is a 10-day, modulated, instructor-led course conducted over two to three weeks with the course covering the following modules:

NGC

Days 1-4: The Management of Health and Safety

Days 5-10: Controlling Workplace Hazards, Day 10: Revision, Day 11: NGC theory assessment; this assessment is conducted over two hours.

Fire Risk Assessment

This is Conducted within the delegate's own workplace. This is a practical and written assessment. On completion, the assessment is to be submitted to the course provider within 10 working days of the final theory assessments. If delegates do not have a workplace, the course provider will arrange a workplace in which delegates can carry out this assessment.

NEBOSH Fire Safety & Risk Management

Course description

The NEBOSH Fire Safety and Risk Management Certificate aims to build on the knowledge gained from the NEBOSH National General Certificate. It provides an appropriate breadth of knowledge for those who are not specialists in fire safety, enabling them to effectively manage workplace fire safety within their roles.

Throughout the course, health and safety experts will deliver each element and issue delegates with additional learning aids, making sure that they are able to cope with the number of guided learning hours and ultimately gain the essential knowledge required.

Who should attend this course?

The NEBOSH Fire Safety and Risk Management Certificate has been designed for responsible persons, including appointed competent persons.

Key benefits

- Delegates will gain an understanding of:
- Fire Safety legislation
- Workplace fire hazards and methods of control
- The theory of accident/incident investigation
- Fire protection in buildings
- The legal framework and organisational responsibilities
- Fire risk assessment process

Course content

The elements covered within this NEBOSH course are:

- Element 1 - Managing fire safety
- Element 2 - Principles of fire and explosion
- Element 3 - Causes and prevention of fire
- Element 4 - Fire protection in buildings
- Element 5 - Safety of people in the event of a fire
- Element 6 - Environmental impacts of fire
- Element 7 - Risk-based fire safety

Prerequisites

Entry to the NEBOSH Certificate in Fire Safety and Risk Management is for those having already attained the NEBOSH National General Certificate in Occupational Health & Safety, in particular Unit 1.

Duration	Maximum delegates	Ways of learning	Certification

Health and Safety Advisory Service

The Health and Safety Advisory Service at GTG makes compliance simple. We'll assess your workplace and create a tailored plan to make sure that your business is up to date with current legislation.

Our tailored advisory solutions make sure that employers can demonstrate compliance with statutory duties, establishing and implementing safety management systems.

We offer:

- Further qualifications
- Telephone support
- Hands-on help and workplace visits
- Industry-specific advice
- Information on new legislation
- Annual audits
- Compliance reviews
- Fire risk assessments

Our health and safety advisory team

Our health and safety consultants are highly skilled and have experience in various sectors and industries.

All our advisors are accredited by the Institute of Occupational Safety and Health (IOSH) and hold from Technical up to Chartered membership status. Our consultants are on hand to offer advice and guidance by email, telephone or face-to-face, giving you peace of mind and helping you to achieve a working environment that's fully compliant.

Get in touch

To start with, you'll receive a health and safety consultation with our advisors. We'll discuss all the services we can offer to make sure that health and safety is effectively implemented in your workplace. From there, the price of our services depends on the size of your business, number of employees and your specific health and safety requirements.

We also offer an easy payment schedule, spread over 12 months.

To find out more about our pricing options, get in touch to book your free consultation today.
